

GREENWAY
ARCHITECTS

ARCHITECTS/ EXPERIENCED GRADUATES

We are seeking design-focused, detail-minded and technically skilled Architects or Experienced Graduates to join our team with demonstrated and extensive experience and a desire to further their career.

THE ROLE

You will have experience working in multi-disciplinary project teams on medium to large commercial projects and be able to deliver within the pace and parameters of those projects.

This role is client-facing and project-delivering. You will be able to effectively collaborate within the office and with external partners, clients, and consultants and can work collaboratively to successfully deliver the project's overall expected outcomes. This is a full-time, studio-based role with some flexible/hybrid working availability.

You will be expected to work on a range of projects across all phases, project types, and scales, from sketch design to documentation and through delivery. You will need to balance multiple project commitments, sectors and deadlines and be comfortable working independently and within and leading teams.

You will have the following technical characteristics:

- A minimum of three years post-graduation experience in commercial architecture, the majority within Australia.
- A strong technical knowledge and the ability to integrate that into commercial construction techniques and materials.
- A strong passion for design.
- Proficiency in technical and presentation drawing techniques with examples, including Revit, Adobe Creative Suite and Microsoft Office.
- Contract Administration experience as appropriate.
- Site experience and project management skills as appropriate.
- You must be a Registered Architect in South Australia or have commenced your pathway to registration.

YOUR SKILLS

You will have the following personal characteristics:

- Agile, adaptable and flexible in your design, project management and personal interaction styles.
- You are a great communicator – both verbally, written and drawn – with all you interact with.
- You are collaborative with others, problem-solving and experience-sharing.
- You are a team player without being confrontational or overbearing.
- You enjoy what you do, and why you do it – we certainly do – despite the speedbumps!

WHAT WE OFFER

We pride ourselves on our design philosophy, project skill and studio culture. We have an excellent staff retention rate and promote a healthy work/life balance with supportive leadership and a friendly team. We provide ongoing professional development and a collaborative workshop-style office. You will benefit from the following:

- Unlimited opportunity on a wide and varied range of project types.
- Leaders that want to see you succeed and progress.
- An office culture you'll want to walk into every day.
- Teammates who are skilled, knowledgeable and excited about what they do, and willing to share.
- Above industry remuneration including a rewarding salary.
- Membership to the AIA and ACA, payment of APBSA Registration Fees.
- Paid training costs associated with CPD requirements.
- Open plan studio in a CBD location.
